## **The InNature Toolkit was piloted in the 5 schools of the partnership and its final version is available!**

The InNature's partners developed a set of educational activities for teachers to use in the classroom! The InNature Toolkit was based on the conclusions of the Strategic Plan developed in the beginning of the project, and it gathers several resources to be used by teachers in their classroom, as well as a handbook to enable the independent use of the resources. The partners started by defining the subjects and type of activities to explore. After designing the activities, a pilot test was organised by the 5 schools in the project in order to get the opinion of the students, as the final beneficiaries of the activities, and ensure the applicability of the resources developed. Each school chose two classes in which they wanted to implement the activities, and which activities to test. Afterwards, the activities were implemented in the classroom for a period of one month. Later, each school produced a report with the feedback of each teacher and the conclusions were used to perform improvements to the activities.
